```
1 """
2 URL configuration for abcbookshop project.
3
4 The `urlpatterns` list routes URLs to views. For more information please see:
5     https://docs.djangoproject.com/en/4.2/topics/http/urls/
6 Examples:
7 Function views
8     1. Add an import:  from my_app import views
9     2. Add a URL to urlpatterns:  path('', views.home, name='home')
10 Class-based views
11     1. Add an import:  from other_app.views import Home
12     2. Add a URL to urlpatterns:  path('', Home.as_view(), name='home')
13 Including another URLconf
14     1. Import the include() function: from django.urls import include, path
15     2. Add a URL to urlpatterns:  path('blog/', include('blog.urls'))
16 """
17 from django.contrib import admin
18 from django.urls import path, include
19
20 urlpatterns = [
21     path("accounts/", include("allauth.urls")),
22     path('admin/', admin.site.urls),
23     path("", include("products.urls"), name="products-urls"),
24     path('products/', include('products.urls')),
25     path('bag/', include('bag.urls')),
26     path('checkout/', include('checkout.urls')),
27     path('profile/', include('profiles.urls')),
28     path('newsletter/', include('newsletter.urls')),
